CONTENTS TO VOLUME 70

PART 1 15 JULY 1975

Statistical characteristics of a turbulent jet. M. M. RIBEIRO and J. H. WHITELAW *page* 1

Fluid shielding of low frequency convected sources by arbitrary jets. T. F. BALSA 17

A turbulence velocity scale for curved shear flows. RONALD M. C. SO 37

A theoretical and experimental study of the velocity distribution and transition to turbulence in free oscillatory flow. CLAIRE CLARION and ROBERT PÉLISSIER 59

An asymptotic solution for slightly buoyant laminar plumes. P. WESSELING 81

Thermal convection in gas–droplet mixtures with phase transition. T. KAMBE and R. TAKAKI 89

Energy transport in a nonlinear and inhomogeneous random gravity wave field. JÜRGEN WILLEBRAND 113

Measurements in an incompressible three-dimensional turbulent boundary layer, under infinite swept-wing conditions, and comparison with theory. B. VAN DEN BERG, A. ELSENAAR, J. P. F. LINDHOUT and P. WESSELING 127

A three-dimensional law of the wall for turbulent shear flows. B. VAN DEN BERG 149

Thermoacoustic effects in a resonance tube. P. MERKLI and H. THOMANN 161

On turbulence and noise of an axisymmetric shear flow. A. MICHALKE and H. V. FUCHS 179

REVIEW

Nonlinear Waves, edited by S. Leibovich and A. R. Seebass 206

PART 2 29 JULY 1975

A proposed model of the bursting process in turbulent boundary layers. G. R. OFFEN and S. J. KLINE 209

On the wave structure of the wall region of a turbulent boundary layer. FRITZ H. BARK 229

Statistical properties of the kinematics and dynamics of a random gravity-wave field. C. C. TUNG 251

Wave-induced vorticity in free-surface boundary layers: application to mass transport in edge waves. B. D. DORE 257

The propagation of planetary waves over a random topography. RICHARD E. THOMSON 267

Internal gravity waves: critical layer absorption in a rotating fluid. R. Grimshaw *page* 287

The influence of shear on mixing across density interfaces. Robert R. Long 305

Withdrawal of a stratified fluid from a vertical two-dimensional duct. Jorg Imberger and Chris Fandry 321

The effects of capillarity on free-streamline separation. R. C. Ackerberg 333

On the development of noise-producing large-scale wavelike eddies in a plane turbulent jet. Lee-Orr Merkine and J. T. C. Liu 353

Laser-Doppler anemometer measurements in drag-reducing channel flows. M. M. Reischman and W. G. Tiederman 369

Mean and fluctuating flow measurements of a fully-developed, non-adiabatic, hypersonic boundary layer. F. K. Owen, C. C. Horstman and M. I. Kussoy 393

Review

Turbulent Flows in Engineering, by A. J. Reynolds 414

Part 3 12 August 1975

Wind-generated gravity–capillary waves: laboratory measurements of temporal growth rates using microwave backscatter. T. R. Larson and J. W. Wright 417

Nonlinear wave interactions in shear flows. Part 2. Third-order theory. J. R. Usher and A. D. D. Craik 437

Intensity, scale and convection of turbulent density fluctuations. M. R. Davis 463

Inviscid interpenetration of two streams with unequal total pressures. M. E. Goldstein and Willis H. Braun 481

The development of magnetohydrodynamic flow due to an electric current discharge. C. Sozou and W. M. Pickering 509

An experimental investigation of low Reynolds number secondary streaming effects associated with an oscillating viscous flow in a curved pipe. Arnold F. Bertelsen 519

Supercritical Reynolds number simulation for two-dimensional flow over circular cylinders. Edmond Szechenyi 529

Wind-tunnel simulation of the atmospheric boundary layer: a report on Euromech 50. J. C. R. Hunt and H. Fernholz 543

Unsteady laminar boundary layers in a compressible stagnation flow. C. S. Vimala and G. Nath 561

Measurements in adverse-pressure-gradient turbulent boundary layers with a step change in surface roughness. W. H. Schofield 573

The low frequency sound from multipole sources in axisymmetric shear flows, with applications to jet noise. M. E. GOLDSTEIN *page* 595

The generation of sound by density inhomogeneities in low Mach number nozzle flows. J. E. FFOWCS WILLIAMS and M. S. HOWE 605

REVIEW

Flow Visualization, by Wolfgang Merzkirch 623

PART 4 26 AUGUST 1975

An unfinished dialogue with G. I. Taylor. G. K. BATCHELOR 625

On the possibility of complete condensation shock waves in retrograde fluids. PHILIP A. THOMPSON and DANIEL A. SULLIVAN 639

Incompressible potential flow past 'not-so-slender' bodies of revolution at an angle of attack. P. SIVAKRISHNA PRASAD and N. R. SUBRAMANIAN 651

Water waves and conjugate streams. G. KEADY and J. NORBURY 663

Internal waves around a body moving in a compressible density-stratified fluid. K. S. PEAT and T. N. STEVENSON 673

Numerical simulation of two-dimensional compressible convection. ERIC GRAHAM 689

Pressure- and buoyancy-driven thermal convection in a rectangular enclosure. L. W. SPRADLEY and S. W. CHURCHILL 705

Pressure-wave propagation through a separated gas–liquid layer in a duct. SHIGEKI MORIOKA and GOICHI MATSUI 721

The laminar flow of dilute polymer solutions through porous media. DAVID F. JAMES and D. R. MCLAREN 733

Lifting-line theory for an unsteady wing as a singular perturbation problem. E. C. JAMES 753

Transition in a two-dimensional plane wall jet. R. A. BAJURA and M. R. CATALANO 773

The distortion of a jet by tabs. L. J. S. BRADBURY and A. H. KHADEM 801

A transport-equation description of nonlinear ocean surface wave interactions. KENNETH M. WATSON and BRUCE J. WEST 815

REVIEWS

Ocean Engineering Wave Mechanics, by M. E. McCormick 827

Shock Waves and Man, by I. I. Glass 828

CONTENTS TO VOLUME 71

PART 1 9 SEPTEMBER 1975

A numerical study of the descent of a vortex pair in a stably stratified atmosphere. F. M. HILL *page* 1

Pulsatile flow in curved pipes. F. T. SMITH 15

The motion generated by a body moving through a stratified fluid at large Richardson numbers. B. J. S. BARNARD and W. G. PRITCHARD 43

Boundary-layer theory for blast waves. K. B. KIM, S. A. BERGER, M. M. KAMEL, V. P. KOROBEINIKOV and A. K. OPPENHEIM 65

Wave propagation in a stratified shear flow. R. J. HARTMAN 89

On blast waves in exponential atmospheres. G. G. BACH, A. L. KUHL and A. K. OPPENHEIM 105

Optical compensation measurements on the unsteady exit condition at a nozzle discharge edge. D. BECHERT and E. PFIZENMAIER 123

The effects of wake splitter plates on bluff-body flow in the range $10^4 < R < 5 \times 10^4$. Part 2. C. J. APELT and G. S. WEST 145

Overstable hydromagnetic convection in a rotating fluid layer. I. A. ELTAYEB 161

Seepage flow in unconfined aquifers. J. A. SHERCLIFF 181

Nonlinear interaction of magnetic field and convection. F. H. BUSSE 193

REVIEW

Principles of Non-Newtonian Fluid Mechanics, by G. Astarita and G. Marrucci 207

PART 2 23 SEPTEMBER 1975

Finite amplitude axisymmetric thermoconvective flows in a bounded cylindrical layer of fluid. G. S. CHARLSON and R. L. SANI 209

Convection in boxes: an experimental investigation in vertical cylinders and annuli. K. STORK and U. MÜLLER 231

Nonlinear processes in rotating fluids: a report on Euromech 56. D. J. ACHESON, D. G. ANDREWS, I. C. WALTON and L. M. HOCKING 241

'Crackle': an annoying component of jet noise. J. E. FFOWCS WILLIAMS, J. SIMSON and V. J. VIRCHIS 251

Interaction of waves with two-dimensional obstacles: a relation between the radiation and scattering problems. J. N. NEWMAN 273

The flow near the bow of a steadily turning ship. MIGUEL HIROO HIRATA 283

A study of the freezing of sea water. R. FARHADIEH and R. S. TANKIN 293

Shear layer instability of an inviscid compressible fluid. Part 2. W. Blumen, P. G. Drazin and D. F. Billings *page* 305

Turbulence measurements in an 'equilibrium' axisymmetric wall jet. B. R. Ramaprian 317

Three-dimensional theory on supercavitating hydrofoils near a free surface. Okitsugu Furuya 339

The creeping motion of liquid drops through a circular tube of comparable diameter. B. P. Ho and L. G. Leal 361

The deepening of a mixed layer in a stratified fluid. P. F. Linden 385

The development of a partially mixed region in a stratified shear flow. R. J. Hartman 407

Part 3 14 October 1975

Evidence for scale similarity of internal intermittency in turbulent flows at large Reynolds numbers. C. W. Van Atta and T. T. Yeh 417

The onset of transient convective instability. D. A. Nield 441

A note on the description of an attached supersonic boundary layer near a point of injection cut-off. A. Amr and D. R. Kassoy 455

Similarity behaviour of momentumless turbulent wakes. Michael L. Finson 465

Constitutive equations in suspension mechanics. Part 1. General formulation. E. J. Hinch and L. G. Leal 481

Nonlinear internal gravity waves in a rotating fluid. R. Grimshaw 497

On the longitudinal dispersion of passive contaminant in oscillatory flows in tubes. P. C. Chatwin 513

Circulations and density distributions in a deep, strongly stratified, two-layer estuary. Robert R. Long 529

Mean and turbulence characteristics of three-dimensional wall jets. N. V. Chandrasekhara Swamy and P. Bandyopadhyay 541

An experimental study of the instability of a stably stratified free shear layer. Yu-Hwa Wang 563

Forces on bodies moving transversely through a rotating fluid. P. J. Mason 577

Forced plumes and mixing of liquids in tanks. A. E. Germeles 601

Part 4 28 October 1975

Contributions to the theory of aerodynamic sound, with application to excess jet noise and the theory of the flute. M. S. Howe 625

Secondary convection in a Hele Shaw cell. Lloyd L. Green and Theodore D. Foster 675

Sound radiation into uniformly flowing fluid by compact surface vibration. J. E. Ffowcs Williams and D. J. Lovely *page* 689

Measurements in a two-dimensional thermal plume along a vertical adiabatic wall. J. J. Grella and G. M. Faeth 701

Three-dimensional laminar compressible boundary layers with large injection. C. S. Vimala and G. Nath 711

Linearized buoyant motion in a closed container. M. C. Jischke and R. T. Doty 729

Horizontal momentum jets in rotating basins. Stuart B. Savage and Rodney J. Sobey 755

A model for the axial decay of a shock wave in a large abrupt area change. S. A. Sloan and M. A. Nettleton 769

Cross-wire anemometry in high intensity turbulence. Narinder K. Tutu and Rene Chevray 785

On the structure of pressure fluctuations in turbulent shear flow. P. J. Mulhearn 801

Three-dimensional turbulent boundary layers in external flows: a report on Euromech 60. T. K. Fanneløp and P. Å. Krogstad 815

CONTENTS TO VOLUME 72

PART 1 11 NOVEMBER 1975

A linear theory of rotating, thermally stratified, hydromagnetic flow. DAVID E. LOPER *page* 1

Hydromechanics of low-Reynolds-number flow. Part 3. Motion of a spheroidal particle in quadratic flows. ALLEN T. CHWANG 17

Some experiments on the motion of an isolated laminar thermal. D. J. SHLIEN and D. W. THOMPSON 35

Boundary layer over a blunt body at low incidence with circumferential reversed flow. K. C. WANG 49

Patterns of convection in spherical shells. F. H. BUSSE 67

A note on natural convection in a vertical slot. G. DE VAHL DAVIS and G. D. MALLINSON 87

Electrohydrostatic instability in electrically stressed dielectric fluids. Part 2. D. H. MICHAEL, J. NORBURY and M. E. O'NEILL 95

A non-central feeding hydrostatic thrust bearing. CHUEN-YEN CHOW 113

On the eigenvalues of the Orr–Sommerfeld equation. M. GASTER and R. JORDINSON 121

A novel form of the MHD Rayleigh–Taylor instability. I. S. ROBINSON 135

Instability of flow in a curved alluvial channel. FRANK ENGELUND 145

Transonic equivalence rule: a nonlinear problem involving lift. H. K. CHENG and M. M. HAFEZ 161

Turbulence measurements in smooth concentric annuli with small radius ratios. K. REHME 189

REVIEW

Design Theory of Fluidic Components, by J. M. Kirshner and S. Katz 207

PART 2 25 NOVEMBER 1975

Scattering and diffraction of sound by moving bodies. D. G. CRIGHTON 209

Calculation of two-dimensional and axisymmetric bluff-body potential flow. P. W. BEARMAN and J. E. FACKRELL 229

Stability of swirling flows with radius-dependent density. Y. T. FUNG and U. H. KURZWEG 243

Developing flow in circular conduits: transition from plug flow to tube flow. M. H. Wagner *page* 257

Thermoconvective instabilities in a horizontal porous layer. J. P. Caltagirone 269

The swimming of flexible slender bodies in waves. R. Coene 289

Evolution of high Reynolds number two-dimensional turbulence. A. Pouquet, M. Lesieur, J. C. André and C. Basdevant 305

Baroclinic-type instability in a gas centrifuge heated from above. Takeo Sakurai 321

A more general effective-viscosity hypothesis. S. B. Pope 331

On wavelike perturbations in a free jet travelling faster than the mean flow in the jet. D. Bechert and E. Pfizenmaier 341

On an oscillatory point force in a rotating stratified fluid. Adabala Ramachandra Rao 353

Axisymmetric rotating flow past a prolate spheroid. John W. Miles 363

Scattering of surface waves by a conical island. Ronald Smith and T. Sprinks 373

On the numerical computation of the minimum-drag profile in laminar flow. R. Glowinski and O. Pironneau 385

Experimental investigations of cavitation-bubble collapse in the neighbourhood of a solid boundary. W. Lauterborn and H. Bolle 391

Part 3 9 December 1975

On the geometry of homogenous turbulence, with stress on the fractal dimension of the iso-surfaces of scalars. Benoit B. Mandelbrot 401

Bounds on energy flux for finite energy turbulence. P. L. Sulem and U. Frisch 417

Instability of a horizontal layer of viscoelastic liquid on an oscillating plane. B. S. Dandapat and A. S. Gupta 425

Nonlinear convection in a rotating fluid. C. Hunter and N. Riahi 433

Conditionally sampled measurements in a heated turbulent jet. R. A. Antonia, A. Prabhu and S. E. Stephenson 455

Turbulent and laminar pipe flow distorted by magnetic forces. A. J. Yule 481

Application of the Langevin equation to fluid suspensions. E. J. Hinch 499

The experimental wave resistance of an accelerating two-dimensional pressure distribution. LAWRENCE J. DOCTERS *page* 513

On the movement of slender bodies near plane boundaries at low Reynolds number. D. F. KATZ, J. R. BLAKE and S. L. PAVERI-FONTANA 529

The flow about the trailing edge of a supersonic oscillating aerofoil. P. G. DANIELS 541

Free shear layer instability due to probes in rotating source–sink flows. CARMEN P. CERASOLI 559

REVIEWS

Developments in the Theory of Turbulence, by D. C. Leslie 587

Journals Galore 589

PART 4 23 DECEMBER 1975

Hydromagnetic edge waves in a rotating stratified fluid. D. G. ANDREWS and R. HIDE 593

Closed-streamline flows past rotating single cylinders and spheres: inertia effects. G. G. POE and ANDREAS ACRIVOS 605

Initial flow field over an impulsively started circular cylinder. M. BAR-LEV and H. T. YANG 625

The large amplitude motion of a liquid-filled gyroscope and the non-interaction of inertial and Rossby waves. W. E. SCOTT 649

Critical-level behaviour and wave amplification of a gravity wave incident upon a shear layer. I. A. ELTAYEB and J. F. MCKENZIE 661

On higher-order spectra of turbulence. C. W. VAN ATTA and J. C. WYNGAARD 673

The electron-beam fluorescence technique for measurements in hypersonic turbulent flows. JEROME A. SMITH and JAMES F. DRISCOLL 695

Double-diffusive convection in an inclined slot. C. F. CHEN 721

An experimental investigation of the stability of plane Poiseuille flow. M. NISHIOKA, S. IIDA and Y. ICHIKAWA 731

The asymptotic behaviour of a starting plume. JASON H. MIDDLETON 753

Internal waves in a viscous atmosphere. W. L. CHANG and T. N. STEVENSON 773

Damped vibration of a string. S. P. LIN 787
